

EzyCargo™

EzyCargo™ connects 90+ global carriers, helping you save all the time and hassle in checking from a single platform for real time flight schedule and availability to book flights. It enables the exchange of electronic shipment data and pouch document with the carriers. The co-loading function facilitates the sharing of AWB for sub-agents. The host-to-host system integration eliminates duplicate data input and ensures data accuracy.

How can EzyCargo™ help FREIGHT FORWARDERS?

Peace of mind gateway for one stop shipment handling process

- EzyCargo™ is community platform connecting forwarders to airlines, providing the convenience to book flights, submit eAWB, track status, and many other functions via a single platform and uniformed process
- EzyCargo™ connects to over 90 international carriers to enable seamless electronic data exchanges

Real time shipment status tracking

- Provide visibility and instant updates of shipment status as returned from the carriers
- Forwarders can trigger track and trace calls on selected shipments for the update of the latest statuses
- The track and trace function supports special shipment status such as temperature and humidity

Easy cargo space reservations

- Provide convenience of a single platform to check flight schedule and availability of our featured carriers for a guided flow booking process
- To facilitate booking confirmation, EzyCargo™ supports the inclusion of rate deal and allotment identification in the booking, thanks to our new features of Rate Manager and Allotment Manager
- Rate Manager allows carrier to distribute rates direct to individual forwarders

Seamless data integration through system connection

- Forwarder can connect its system with EzyCargo™ for direct data integration, allowing single process and view within the forwarder’s in-house system
- Work efficiency and data accuracy are guaranteed

Hassle-free eAWB submission minimizes operating cost

- EzyCargo™ facilitates submission of eAWB and pouch documents from forwarders to carriers, enabling real paperless operations
- Improve operation efficiency in eliminating paperwork and duplicated manual processes, saving costs from rectifying data errors

Effective co-loading to sub agents

- EzyCargo™ makes it possible for sub-agents to direct submit eAWB and recognized by the carriers
- Works of master agents, owner of the AWB, are reduced to a single assign process

EzyCargo™

EzyCargo™ connects forwarder to carriers and carrier to forwarders. The power of E-reservation of cargo space with real time checking of flight availability and instant confirmation from allotment elevates business productivity to a new level. The Track and Trace function provides instant cargo status updates in real time. It eases the complexity in exchanging AWB shipment data with global forwarders via a single integration with standardized workflow and message format.

How can EzyCargo™ help CARGO CARRIERS?

Data quality improves efficiency

- EzyCargo™ facilitates the exchange of eAWB and digitized pouch documents. System performs validation allowing quality data are submitted to the airlines

Enhance data reliability

- Paperless operation greatly improves operation efficiency by rejecting invalid or missing data during data exchange process
- Data are received in timely and accurate manner, making sure no delay will be caused by rectification of shipment data

Shipment status with 24/7 updates

- The track and trace function differentiates carriers customer centric services by providing instant cargo status updates around the clock
- The function supports special shipment status such as temperature and humidity

Extensive global connections

- EzyCargo™ expands global distribution over 15,500 forwarders and 70 countries worldwide

Business optimization

- EzyCargo™ allows seamless exchange of AWB shipment data with real time flight schedule and booking confirmation
- Allotment confirmation promotes productivity, supporting automatic allotment matching
- Our enhanced feature, Rate Manager, elevates business opportunities for cargo rates distribution in one single platform
