

EzyCustoms™

EzyCustoms™ understands the key for operation optimization are compliance, data integrity, accuracy and security. The web-based multi-customs connected solution accelerates operation efficiency by applying one simple and generic workflow across different Customs.

How can EzyCustoms™ help?

Multi-Customs compliance control

- Compliance to different customs regulations around the world eases the jobs for operation staff, greatly facilitate advance cargo clearances

Standardized workflow enhances productivity

- EzyCustoms™ translated standard shipment data and submit declarations as per individual Customs required specifications, improving carriers efficiency in releasing arrival cargo

High data integrity and security

- EzyCustoms™ alerts carriers with data validation for compliance and identification of any discrepancies or exceptions
- Only authorized users can manage and monitor the process to assures data security and privacy

Real time alert for clearance status

- Acknowledgement from local Customs authorities will be updated
- Special alert for attention and action will be promptly triggered to carriers and ground handlers for further action, ensuring smooth cargo clearance and release; in addition to reducing penalties cost and sanctions

Complete automation eliminates operating costs

- E-submission of clearance information reduces paper work and human errors, eventually minimize rework and customs delay
