

EzyFreight™

EzyFreight™ is the genuine integrated electronic cargo Document Management Solutions (DMS) to meet the needs for all stakeholders along the transportation chain. Offering a simple plug-and-play solution along the cargo acceptance process, EzyFreight™ improves the efficiency of information exchange in enabling paperless operations.

How can EzyFreight™ help?

Greater visibility of cargo acceptance status

- EzyFreight™ is a real time application, which enables automatic cargo acceptance with electronic data, elevating operation efficiency for carriers and ground handlers in focusing on shipments with discrepancies
- E-AWB, digitized pouch document, and warehouse data are seamlessly integrated to perform validation

Automated validation from reliable data

- Our strong business rule engine ensures every shipment is validated against generic and airline specific rules checking, taking into considerations of acceptable tolerance
- With minimal human intervention, it greatly improves operations security, avoids revenue leakage and reduces penalty caused by inaccurate data

E-Freight operation minimizes operating cost

- EzyFreight™ promotes paperless operations. E-AWB validation check will be performed to ensure cargo acceptance can be conducted accurately, smoothly and efficiently
- Only quality data are returned to the airline system
- Ultimately minimizes operating costs

Flexible and accurate data

- Paperless operations facilitate high flexibility of data transmission and retrieval, expedites operation efficiency
