

# EzyPost™

The proactive consignment management solution works for both CARDIT and RESDIT exchange. EzyPost™ consolidates mail information processing, operational management and UPU standardized messaging on one single platform. You can also generate customized performance reports to review productivity.

## How can EzyPost™ help?

### Compliance with diversified postal requirements over the world

- EzyPost™ allows standardized workflow in a single integrated mail portal for the management of worldwide mail consignment

### Full visibility of CARDIT & RESDIT

- Integrate carriers and posts for data exchange, the seamless integration relay transport requests (CARDIT) from post offices, and return statuses (RESDIT)

### Customized performance report

- The reports measure actual milestone against planned events to yield useful leads to measure ports performance and design actions for service quality improvement

### Automated mailbags scanning applications enhances operation efficiency

- EzyPost™ provides an application for carriers to scan and report transport status at RESDIT milestones
- Ground Handlers can apply the same application to serve multiple carriers by reporting status via Mail Label Data (MLD) specification
- EzyPost™ supports Mail Registration Device (MRD) to capture status at transfer of custody
